Alternative Energy: Invest in a Girl, Change the World

Environmental degradation impacts the natural resources on which communities around the world depend. Reduced quality and availability of land, food, and aquatic resources increase time burdens and provoke conflict, which undermine health, education, and livelihoods, increasingly and disproportionately of girls and women.

In the 2nd annual *Our Common Future* lecture, Annie Griffiths, one of the first female photographers to work for National Geographic, will discuss her effort to document the aid programs that are empowering girls and women in the developing world as they deal with the devastating effects of climate change.

Book signing to follow the lecture. Light refreshments will be provided. Free and open to the public. Co-sponsored by the Global Water for Sustainability Program as part of World Water Day 2014.

Featuring

Annie Griffiths

Photojournalist, National Geographic Society

Founder and Executive Director, Ripple Effect Images

Thursday, Mar. 20, 2014

7:00 p.m.
